

PUYALLUP'S RAIN GARDEN PROGRAM

COST-SHARE PROGRAM APPLICATION

Please complete this application and submit to Stormwater Engineering via email at: EcoFriendly@ci.puyallup.wa.us, or mail to: 333 S Meridian, Puyallup, WA 98371.

APPLICANT INFORMATION

Name:			
Street address:			
ZIP Code:	Phone:	Email:	
Parcel No.:			
Is your property within City of Puyallup limits:		Yes	No
Owned	Rented	If rented, please provide landlord information	Landlord: Phone:

GREEN STORMWATER INFRASTRUCTURE INFORMATION

What GSI are you interested in installing (check all that apply):			
Rain Garden	Permeable Pavement	Rain Barrel	
Do you have any GSI currently installed on your property:		Yes	No

SIGNATURE

Applicant Signature:	Date:
----------------------	-------

TO BE COMPLETED BY PROGRAM STAFF

PRELIMINARY SITE EVALUATION

Staff name:	Date:				
Parcel address evaluated:					
Property within City of Puyallup limits:	Yes	No			
Potential location away foundation(s):	Yes	No	N/A	How far:	ft
Condition of existing GSI:	Maintained	In need of upkeep	N/A		
Explain:					

PERCOLATION TEST

Staff name:	Date:					
Test location: (Attach sketch of property and identify test location and existing structures)						
PIT depth:	in Water:	in	Time:	start	end	Infiltration rate:

PROGRAM DETERMINATION

Applicant Approved:	Yes	No	Date
Rain Garden	Permeable Pavement	Rain Barrel	
Explain:			

Program Eligibility and Restrictions

This is a cost-share program wherein the program participant pays for all costs involved and receives reimbursement based on funding availability, project type and eligible expenses for a portion of the costs involved. For permeable pavements: the City will reimburse the participant 50% of the total eligible cost, up to \$7,500. For rain gardens, participants pay all labor costs and the City pays for eligible material costs such as plants and soil, up to \$1,000. For rain barrels: the City will reimburse the participant up to \$125, not to exceed the price of the rain barrel.

This program has limited funding and is available on a first-come first-served basis according to application date, and until funds run out. Preliminary site visits must be held and percolation tests completed within three (3) weeks of application date. Applications will be approved/denied based on application content, site suitability, and program-fund availability. Once approved, installations must be completed and reimbursement form submitted (rain barrels only) within three (3) months of approval date. Design and install location shall be reviewed by the CITY for conformity with design guidelines. Eligible GSI includes: rain gardens, permeable pavements, and rain barrels. PARTICIPANTS may install one (1) each of the eligible GSI elements per the program restrictions.

The program is open to existing residential properties, replacing existing impervious surfaces. The program is not open to commercial properties or new construction projects including projects subject to design standards effective January 1, 2017.

Rain garden designs and installations shall follow the Rain Garden Design Manual for Western Washington and permeable pavements shall follow the 2012 Low Impact Development Technical Guidance Manual for Western Washington. Design and location shall be reviewed by the City. Properties shall be located within City of Puyallup limits.

The cost-share amounts for each the CITY and PARTICIPANT are typically not equal, and will depend on design, PARTICIPANT-selected CONTRACTOR, and other factors. Submittal of an application does not guarantee available funds or approval for program. Any work performed or costs incurred for rain gardens or permeable pavements prior to execution of a Cost-Share Agreement with the CITY will not be program eligible. Rain barrel purchases made prior to program approval may not be eligible for reimbursement.

Permeable pavements shall be installed by a licensed contractor experienced in landscaping or pavement construction and pre-approved by the CITY. Permeable pavement installations are limited to replacement in-place of existing impervious pavements or surfaces and in areas that are subject to stormwater runoff and not covered by a carport, awning, or other structure.

Rain Gardens, up to and including grading of the rain garden to meet design plans, and installation of mulch layer shall be completed by a licensed contractor experienced in landscaping or construction projects and pre-approved by the CITY. Rain garden designs and installations shall follow the Rain Garden Design Manual for Western Washington.

Rain barrels shall be a minimum of 40 gallons in size and pre-made. Materials for construction of a 'homemade' barrel do not qualify for reimbursement. Delivery and installation costs of the purchased rain barrel may be included in total allowed reimbursement amount.

Total, combined CITY cost & reimbursement for all approved PARTICIPANT projects, including all selected and approved GSI elements, shall not exceed \$8,725. Complete details are outlined in the Cost-Share Application, Cost-Share Agreement and Rain Barrel Reimbursement Form.
