SEPA ENVIRONMENTAL CHECKLIST (2015 UPDATED VERSION)

Purpose of Checklist:

The State Environmental Policy Act (SEPA), Chapter 43.21 RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

If you are not already submitting an 8-1/2" x 11" reduction of your project site plan to the city as part of a companion case submittal, please submit a copy as a part of this SEPA application.

Please submit eight (8) copies of the completed SEPA checklist application packet.

A. BACKGROUND

1. Name of proposed project:

Copperberry Condominiums

2. Name of Applicant:

Bill Riley for BRC Family LLC

3. Mailing address, phone number of applicant and contact person:

1002 39th ave SW Puyallup, WA. 98373 Suite 104

4. Date checklist prepared:

March 30, 2021

5. Agency requesting checklist:

City of Puyallup Planning Department

6. Proposed timing or schedule (including phasing, if applicable):

Start Construction Jan. 2022

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

No

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

Reviewed the City of Puyallup wetland maps and there are no wetlands in the immediate area. The City of Puyallup indicates this project is in a potential landslide area however the slight slope of the lot would not indicate that.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No

10. List any governmental approvals or permits that will be needed for your proposal, if known.

1. SEPA DNS/MDNS,2. Preliminary landscape plan,3. Traffic Scoping Worksheet,4. Preliminary utility plan,5. Storm Water Plan,6. Geo-technical report,7. Proposed Building Elevations,8. Final Design approval from the Puyallup Design Board.

11. Give brief, complete description of your proposal, including uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information or project description).

Construct 12 condominiums homes within 2 buildings and with approximately 1200 Sq. Feet of commercial office space attached

12. Location of proposal. Give sufficient information for a person to understand the precise location of your proposed project, including street address, if any, and section, township, and range, if known. If the proposal would occur over a range of area, provide the range of boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The project is located at approximately 4002 10th Street SE in Puyallup, WA 98373 and consists of 3 separate parcels. Parcel #'s 438900-018-0,017-0,016-0

B. ENVIRONMENTAL ELEMENTS

1. Earth

- a. General description of the site (circle one): Flat, rolling, hilly, steep, slopes, mountains, other flat to slightly sloped
- b. What is the steepest slope on the site (approximate percent slope)? 5-10%
- c. What general types of soils are found on the site (for example: clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Gravel/ Sand mixture:See Geo-Technical survey

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

- e. Describe the purpose, type and approximately quantities of any filling or grading proposed. Indicate source of fill.

We do not expect any import to be brought into the site. We will be using all existing soils to back fill the site and buildings.

- f. Could erosion occur as a result of clearing, construction or use? If so, generally describe.

There is a slight slope moving from east(10th Street SE) to the western boundary of the property with a elevation change of about 5-10% change.

- g. About what percent of the site will be covered with impervious surface after project construction (for example: asphalt or buildings)?

Approximately 50-70%

- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Stabilize the site with silt fencing, tarping of spoils/excavation materials prior to installation.

2. Air

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Heavy equipment machinery will be used to clear and excavate the site for the construction of buildings of which emissions will be emitted into the air. Labor and Materials to construct the project will emit into the air. The Condo units will be heated with gas heat of which emissions will be emitted into the air from its use. Lastly home buyers that purchase will mostly use cars that emit into the air.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

not that we know of.

- c. Proposed measures to reduce or control emissions or other impacts to air, if any.

By building on a Transit line it is our belief that buyers of these homes will use public transit. The new energy code requires homes to be more energy efficient.

3. Water

- a. Surface Water:

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream and river it flows into.

No

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None

4. Will the proposal requires surface water withdrawals or diversions? Give general description, purpose, and approximate quantities, if known.

No

5. Does the proposal lie within a 100-year floodplain. If so, note location on the site plan.

No

6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No, however discharges, if any will be held on site

b. Ground:

1. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No

2. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals.....; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water Runoff (including storm water):

1. Describe the source of runoff (including storm water) the method of collection and disposal, if any (including quantities, if known). Where will this water flow? Will this flow into other waters? If so, describe.

All storm water will be directed underground and infiltrated. It is not anticipated the City of Puyallup Storm pipe located on the west side of the project will be used but can for a back up- Its not anticipated the site will need porous asphalt.

2. Could waste materials enter ground or surface waters? If so, generally describe.

No, all run off will be contained on site during and after construction of the infiltration system.

3. Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

We will follow all rules and regulations requested by the City of Puyallup and the WA. State. Dept. of Ecology

4. **Plants**

a. Check or circle types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- pasture
- crop or grain
- orchards, vineyards or other permanent crops.
- wet solid plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

The entire site will be cleared with the exception of the west 15 feet that has a no vegetation removal area covenant.

c. List threatened or endangered species known to be on or near the site.

None Known

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

A landscape plan approved by the City of Puyallup shall be followed

- e. List all noxious weeds and invasive species known to be on or near the site.

none known

5. Animals

- a. Circle any birds and animals which have been observed on or near the site or are known to be on or near the site:

Birds: hawk, heron, eagle, songbirds, other None

Mammals: deer, bear, elk, beaver, other None

Fish: bass, salmon, trout, herring, shellfish, other: None

- b. List any threatened or endangered species known to be on or near the site.

None

- c. Is the site part of a migration route? If so, explain.

No as far as we know

- d. Proposed measures to preserve or enhance wildlife, if any.

There isn't any noticeable wildlife activity in the area.

- e. List any invasive animal species known to be on or near the site.

None that are known

6. Energy and Natural Resources

- a. What kind of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Gas and or Electric for heat and or hotwater. Potentially a split system air conditioner.

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No

- c. What kind of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

Will be built to the new WA. State Building and Energy code.

7. Environmental Health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

None

1. Describe any known or possible contamination at the site from present or past uses.

None

2. Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

3. Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4. Describe special emergency services that might be required.

None

5. Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

1. What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Equipment operations during the horizontal phase along with normal residential construction noise as a result of the vertical construction phase

2. What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

See above. Total time of construction to completion will be approximately one year.

3. Proposed measures to reduce or control noise impacts, if any.

Not avoidable. The contractor will follow normal working hours as approved by the City of Puyallup

8. Land and Shoreline Use

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

East- Condominiums, West- single family homes, North- office buildings, South- Office buildings.

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to non-farm or non-forest use?

No

1. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No

c. Describe any structures on the site.

None

d. Will any structures be demolished? If so, what?

N/A

e. What is the current zoning classification of the site?

LMX- Mixed use

f. What is the current comprehensive plan designation of the site?

Same as above

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

None known

i. Approximately how many people would reside or work in the completed project?

12-24

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any?

N/A

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

The final plans will be approved by Planning and the Design Review Board

- m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any:

None

9. Housing

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

12 units - 11 middle price range- 1 unit(mid to low) in perpetuity to be available to a unit owner that makes 80% of County AMI

- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle or low-income housing.

None

- c. Proposed measures to reduce or control housing impacts, if any.

None needed

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principle exterior building material(s) proposed?

Tallest height of approximately 35 feet or less. Lap Hardi cement siding.

- b. What views in the immediate vicinity would be altered or obstructed?

nothing substantial

- c. Proposed measures to reduce or control aesthetic impacts, if any.

Landscaping and leaving a buffer on the west side of the project

11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

There will be outside lighting as required by the City of Puyallup designed to as per the City of Puyallup Building Code.

- b. Could light or glare from the finished project be a safety hazard or interfere with views?

No

- c. What existing off-site sources of light or glare may affect your proposal?

None

- d. Proposed measures to reduce or control light and glare impacts, if any?

Lighting fixtures located on the project will be approved by the City of Puyallup Planning and or Building Department.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?

Bradley Park

- b. Would the proposed project displace any existing recreational uses? If so, describe.

No

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any.

The Project will have individual open areas per unit as designated by the City of Puyallup

13. Historic and Cultural Preservation

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe.

None

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

None known

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

On site observations

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None

14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Pierce Transit Bus stop located on the east side of the project.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes a Bus Stop is located directly east and south of the project on the east side of 10th street SE approximately 100 feet from the project.

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

24 residential and 4 commercial spots which includes one handicap stall. As well there is on street parking in from of the project on both sides of 10th street SE

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

None anticipated with the exception of the city of Puyallup may require an area for a bike rack.

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

To be provided in the Traffic Scoping report.

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

None

- h. Proposed measures to reduce or control transportation impacts, if any:

Encourage Condominiums owners to use public transportation.

15. Public Services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

None anticipated

- b. Proposed measures to reduce or control direct impacts on public services, if any.

Building in an area that is walkable.

16. Utilities

- a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

Electricity, water, telephone, cable, internet, sanitary sewer, storm sewer, gas.

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Gas, Electric,internet, phone, cable

C. SIGNATURE

I hereby state that I am the owner or authorized agent listed above, and certify that all information contained above and in exhibits attached hereto are true and correct to the best of my knowledge and belief. I understand that the processing of this application may require additional supporting material upon request to City staff.

RIGHT OF ENTRY: By signing this application the applicant grants unto the City and it's agents the right to enter upon the premises for purpose of conducting all necessary inspection to determine compliance with applicable laws, codes, and regulations. This right of entry shall continue until a certificate of occupancy is issued for the property.

Signature of Property Owner:  Ronald McCombs
3/30/2021 10:47:30 PM PDT
 Date: 03/30/2021

Signature of Agent: William J. Riley for the BRC Family LLC
 Date: 3-30-2021

I declare under penalty of perjury of the laws of the State of Washington that the foregoing is true and correct.

Dated: 3-30-2021 in Puyallup, Washington.

William J. Riley
 (Signature of Applicant)
